OR
If paying personally, mail this form with check made out to Ilda King at the letterhead address above.

DESCRIPTION: Comprehension for instructional reading level is assessed using any of a variety of tools. In this workshop, 3-4 varied reading inventories will be compared to help you determine which is best for your population or individual. This is NOT a workshop where you will learn to administer instruments. But, you will receive tips for making the assessments more accurate and generalizable. We will start with an overview of *Question-Answer Relationships* and *Bloom's Taxonomy* as they are still used to develop and categorize questions on tests of any nature. Topics for comparison and discussion of inventories include:

- passage or book
- prior knowledge or purpose for reading
- total accuracy vs total acceptability
- fluency
- literal, inferential, critical response
- information from, beyond or about the book
- skills based (main idea, vocabulary etc.)
- standards based

If you already use Curriculum Based Assessment, this knowledge completes the full reading profile. Dr. King has guided several school districts in the use of these instruments. A certificate of 6 hours attendance is given at the end of the day to add to PDPs.
